PLASTIC LUV

*Ken Bauer, one of Sweden's rising musical exports, drops his latest track 'Plastic Luv' on promo, forthcoming on **Stockholm Beats®**.*

Hailing from Stockholm in Sweden, **Ken Bauer's** journey into production began in 2015 & since then, his ascension through the global ranks has been a pretty meteoric one. Having picked up a multitude of heavyweight DJ support from the likes of **Sander Van Doorn, Yves V, Quintino, Nicky Romero & Dada Life**, along with the recent support from **musikbyLukas** (Spinnin, Armada, Future House Music) and **Sonny Bass** (Armada) along the way, Ken's relentless drive & underlying focus for delivering tougher, more club focused cuts has been clear to see, or rather hear.

Ken's latest offering '**Plastic Luv**' tries on a new formula best described as Future Trance, a blend between Future House & Trance, as the track delivers beautiful lush vocals and a pulsing arp followed by a powerful and groovy drop.

Due for release on **Stockholm Beats®** – '**Plastic Luv**' once again sets the bar for his forthcoming productions, from here & beyond – as **Ken Bauer's** beat firmly goes on.
